Contents of Volume 118

Number 1, 7 January 1986

NOTE FROM THE EDITORS	1
ISHIDA, K., Fluctuations and Mutation in Hypercyclic Organization	3
TONKYN, D. W., Predator-mediated Mutualism: Theory and Tests in the Homoptera	15
GEBER, M. A. and CHARNOV, E. L., Sex Allocation in Hermaphrodites with Partial Overlap in Male/Female Resource Inputs	33
STAMATO, F. M. L. G., LONGO, E., FERREIRA, R. and TAPIA, O., The Catalytic Mechanism of Serine Proteases. III An Indo-ISCRF Study of the Methylacetate Docking in α -Chymotrypsin	45
RIZZOTTI, M. and ZANARDO, A., Axiomatization of Genetics 1. Biological Meaning	61
DILMAN, V. M., Ontogenetic Model of Ageing and Disease Formation and Mechanisms of Natural Selection	73
MCCOY, E. L. and BOERSMA, L., The Bioenergetics of Axial Plant Growth I. Concept and Model Formulation	83
MEAKIN, P., A New Model for Biological Pattern Formation	101
GREGORIUS, H.-R. and ZIEHE, M., The Significance of Over- and Underdominance for the Maintenance of Genetic Polymorphisms II. Overdominance and Instability with Random Mating	115

Number 2, 21 January 1986

NOTE FROM THE EDITORS	127
STUBBLEFIELD, E., A Theory for Developmental Control by a Program Encoded in the Genome	129
ZANARDO, A. and RIZZOTTI, M., Axiomatization of Genetics 2. Formal Development	145
PICKETT-HEAPS, J. D., TIPPIT, D. H., COHN, S. A. and SPURCK, T. P., Microtubule Dynamics in the Spindle. Theoretical Aspects of Assembly/Disassembly Reactions <i>in vivo</i>	153

WASSERSUG, R., How Does a Tadpole Know When to Metamorphose? A Theory Linking Environmental and Hormonal Cues	171
BALBI, C., PALA, M., PARODI, S., FIGARI, G., CAVAZZA, B., TREFILETTI, V. and PATRONE, E., A Simple Model for DNA Elution from Filters	183
KLOPMAN, G. and KALOS, A. N., Quantitative Structure-Activity Relationships of <i>Beta</i> -Adrenergic Agents. Application of the Computer Automated Structure Evaluation (CASE) Technique of Molecular Fragment Recognition	199
PATE, E. and COOKE, R., A Model for the Interaction of Muscle Cross-bridges with Ligands which Compete with ATP	215
MURRAY, J. D. and SMITH, D. A., Theory of the Rotational Contribution to Facilitated Diffusion	231
LETTER TO THE EDITOR	
SIBLY, R. M. and GRIME, J. P., Strategies of Resource Capture by Plants— Evidence for Adversity Selection	247

Number 3, 7 February 1986

NOTE FROM THE EDITORS	251
BELL, G., The Evolution of Empty Flowers	253
PROTHERO, J., Methodological Aspects of Scaling in Biology	259
SMITH, R. J., GERMAN, R. Z. and JUNGERS, W. L., Variability of Biological Similarity Criteria	287
SILVERMAN, B. D. and LINSKER, R., A Measure of DNA Periodicity	295
PATE, E. F. and OTHMER, H. G., Differentiation, Cell Sorting and Proportion Regulation in the Slug Stage of <i>Dictyostelium discoideum</i>	301
CHARNOV, E. L. and BULL, J. J., Sex Allocation Pollinator Attraction and Fruit Dispersal in Cosexual Plants	321
BASS, L., BRACKEN, A. J. and HILDEN, J., Flux Ratio Theorems for Nonstation- ary Membrane Transport With Temporary Capture of Tracer	327
LI, J. K-J., Comparative Cardiac Mechanics: Laplace's Law	339
SHIRANE, K. and TOKIMOTO, T., Dynamic Approach to Thermotropic and Inotropic Phase Transitions	345
BREMER, H., A Stochastic Process Determines the Time at which Cell Division Begins in <i>Escherichia coli</i>	351
HONDERICH, T., Mind, Brain and Time: Rejoinder to Libet	367

Number 4, 21 February 1986

NOTE FROM THE EDITORS	377
CARACO, T. and BROWN, J. L., A Game Between Communal Breeders: When is Food-Sharing Stable?	379
FISHER, R. E. and MAYOR, H. D., Evolution of a Defective Virus from a Cellular Defense Mechanism	395

JAMES, W. H., Hormonal Control of Sex Ratio	427
GRAUR, D., The Evolution of Electrophoretic Mobility of Proteins	443
KHAIT, A., Hormonal Mechanisms for Size Measurement in Living Organisms in the Context of Maturing Juvenile Plants	471
MANNING, J. T. and DICKSON, D. P. E., Asexual Reproduction, Polyploidy and Optimal Mutation Rates	485
HOKKANEN, J. E. I., The Size of the Largest Land Animal	491
ANNOUNCEMENT	i

Index to Volume 118

- Activity-structure quantitative relationships of *beta*-adrenergic agents. Application of the computer automated structure evaluation (CASE) technique of molecular fragment recognition, 199
- beta*-Adrenergic agents, structure-activity quantitative relationships of; application of the computer automated structure evaluation (CASE) technique of molecular fragment recognition, 199
- Adversity selection, evidence for; strategies of resource capture by plants (letter), 247
- Ageing and disease formation and mechanisms of natural selection, ontogenetic model of, 73
- Animal, land, largest, the size of, 491
- Asexual reproduction, polyploidy and optimal mutation rates, 485
- Assembly/disassembly reactions *in vivo*, theoretical aspects of; microtubule dynamics in the spindle, 153
- ATP, a model for the interaction of muscle cross-bridges with ligands which compete with, 215
- Axial plant growth, the bioenergetics of; concept and model formation, 83
- Axiomatization of genetics. Biological meaning, 61
- Axiomatization of genetics. Formal development, 145
- BALBI, C., PALA, M., PARODI, S., FIGARI, G., CAVAZZA, B., TREFILETTI, V. and PATRONE, E., A simple model for DNA elution from filters, 183
- BASS, L., BRACKEN, A. J. and HILDEN, J., Flux ratio theorems for nonstationary membrane transport with temporary capture of tracer, 327
- BELL, G., The evolution of empty flowers, 253
- Bioenergetics of axial plant growth. Concept and model formation, 83
- Biological pattern formation, a new model of, 101
- Biological similarity criteria, variability of, 287
- Biology, methodological aspects of scaling in, 255
- BOERSMA, L. (see MCCOY, E. L.), 83
- BRACKEN, A. J. (see BASS, L.), 327
- Brain, mind and time: rejoinder to Libet, 367
- Breeders, communal, a game between; when is food-sharing stable?, 379
- BREMER, H., A stochastic process determines the time at which cell division begins in *Escherichia coli*, 351
- BROWN, J. L. (see CARACO, T.), 379
- BULL, J. J. (see CHARNOV, E. L.), 321
- CARACO, T. and BROWN, J. L., A game between communal breeders: when is food-sharing stable?, 379
- Cardiac mechanics, comparative; Laplace's Law, 339
- Catalytic mechanism of serine proteases. An Indo-ISCRCF study of the methylacetate docking in α -chymotrypsin, 45
- CAVAZZA, B. (see BALBI, C.), 183
- Cell division cycle, sloppy size control of, 405
- Cell division in *Escherichia coli*, a stochastic process determines the time of commencement, 351
- Cell sorting in the slug stage of *Dictyostelium discoideum*, 301
- Cellular defense mechanism, evolution of a defective virus from, 395
- CHARNOV, E. L. and BULL, J. J., Sex allocation pollinator attraction and fruit dispersal in cosexual plants, 321

- CHARNOV, E. L. (see GEBER, M. A.), 33
- α -Chymotrypsin, an Indo-ISCRF study of the methylacetate docking in; catalytic mechanism of serine proteases, 45
- COHN, S. A. (see PICKETT-HEAPS, J. D.), 153
- Communal breeders, game between; when is food-sharing stable?, 379
- Computer automated structure evaluation (CASE) technique of molecular fragment recognition. Application to quantitative structure-activity relationships of *beta*-adrenergic agents, 199
- COOKE, R. (see PATE, E.), 215
- Cosexual plants, sex allocation pollinator attraction and fruit dispersal in, 321
- Cross-bridges, muscle, interaction with ligands which compete with ATP; a model, 215
- Cues, environmental and hormonal, for tadpole metamorphosis, 171
- Defense mechanism, cellular, evolution of a defective virus from, 395
- Developmental control by a program encoded in the genome, a theory for, 129
- DICKSON, D. P. E. (see MANNING, J. T.), 485
- Dictyostelium discoideum*, differentiation, cell sorting and proportion regulation in the slug stage of, 301
- DIEKMANN, B. (see TYSON, J. J.), 405
- Differentiation, cell sorting and proportion regulation in the slug stage of *Dictyostelium discoideum*, 301
- Diffusion, facilitated, theory of the rotational contribution to, 231
- DILMAN, V. M., Ontogenetic model of ageing and disease formation and mechanisms of natural selection, 73
- Disease formation and ageing and mechanisms of natural selection, ontogenetic model of, 73
- DNA elution from filters, a simple model for, 183
- DNA periodicity, a measure of, 295
- Dominance: the significance of over- and underdominance for the maintenance of genetic polymorphisms; overdominance and instability with random mating, 115
- Dynamic approach to thermotropic and inotropic phase transitions, 345
- Dynamics of microtubules in the spindle; theoretical aspects of assembly/disassembly reactions *in vivo*, 153
- Electrophoretic mobility of proteins, the evolution of, 443
- Environmental and hormonal cues for tadpole metamorphosis, 171
- Escherichia coli*, a stochastic process determines the time at which the cell division begins in, 351
- Evolution of a defective virus from a cellular defense mechanism, 395
- Evolution of electrophoretic mobility of proteins, 443
- Evolution of empty flowers, 253
- Filters, a simple model for DNA elution from, 183
- FISHER, R. E. and MAYOR, H. D., Evolution of a defective virus from a cellular defense mechanism, 395
- Flowers, empty, the evolution of, 253
